Project Overview:

Project Name: Team Enrollment Confirmation - Import Data using Transform Maps (Spreadsheet)

Project Description: The project imports team enrollment data from a spreadsheet into the application using a data source, an import set and a Transform Map, so that each team member's enrollment is created correctly and confirmed.

Project Version: [Version Number]

Testing Period: [Start Date] to [End Date]

Testing Scope:

Features and functionalities to be tested: spreadsheet upload as data source, loading data into the import set table, Transform Map field mapping, duplicate handling (coalesce on email), error handling for invalid or incomplete rows, and enrollment confirmation.

User stories or requirements to be tested: the user stories in the project backlog (Sprints 1 to 4) covering data source setup, transform map configuration, enrollment confirmation, and testing.

Testing Environment:

URL/Location: [Web URL or Application Location]

Credentials (if required): [Username/Password]

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Upload a valid spreadsheet as the data source	Open the data source record Attach a valid .xlsx file Click Load All Records	File is accepted and all rows are loaded into the import set table		

TC-002	Upload an invalid file type (negative)	Open the data source record Attach an unsupported file (e.g., .pdf) Click Load All Records	Error is shown and no data is loaded		
TC-003	Map source fields using the Transform Map	Create a Transform Map from the import set to the Team Enrollment table Map each source field to its target field Save the map	Fields are mapped correctly and the map is saved		
TC-004	Run the transform with valid data	Open the Transform Map Click Transform Open the Team Enrollment table	All records are created with the correct field values		
TC-005	Import a duplicate enrollment (coalesce on email)	Import a record with an existing email Run the transform Check the Team Enrollment table	Existing record is updated and no duplicate is created		
TC-006	Import a row with a missing required field (negative)	Prepare a row with the email missing Load and transform the data Check the import log	Incomplete row is skipped or flagged in the log and valid rows are still imported		
TC-007	Confirm the enrollment after import	Import valid enrollment data Open an imported record Check the enrollment status	Enrollment status shows as Confirmed		

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback

BG-001	[Describe the issue or bug encountered]	[Step 1] [Step 2] [Step 3]	[Low/ Medium/ High]	[Open/In Progress/ Closed]	[Any additional comments or feedback]

Sign-off:

Tester Name: [Name of Tester]

Date: [Date of Test Completion]

Signature: [Tester's Signature]

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
